Report on Internal Control Over Financial Reporting

AgFirst Farm Credit Bank's (Bank) and each affiliated District Agricultural Credit Association's (District Association) principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Bank's and each District Association's respective Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Bank's and each District Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the respective Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Bank and each District Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Bank and each District Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Bank's and each District Association's assets that could have a material effect on its Consolidated Financial Statements.

The Bank's and each District Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of June 30, 2016. In making the assessment, management used the framework in *Internal Control — Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Bank's and each District Association's management concluded that as of June 30, 2016, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Bank's and each District Association's management determined that there were no material weaknesses in the internal control over financial reporting as of June 30, 2016.

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion reviews the combined financial condition and results of operations of AgFirst Farm Credit Bank (AgFirst or Bank) and the District Agricultural Credit Associations (Associations or District Associations), collectively referred to as the District, as of and for the three and six month periods ended June 30, 2016. These comments should be read in conjunction with the accompanying financial statements, the Notes to the Combined Financial Statements, and the 2015 Annual Report of AgFirst Farm Credit Bank and District Associations. The accompanying combined financial statements were prepared under the oversight of the Audit Committee of the AgFirst Board of Directors.

As of June 30, 2016, the District included nineteen Associations, all of which were structured as Agricultural Credit Association (ACA) holding companies, with Federal Land Credit Association (FLCA) and Production Credit Association (PCA) subsidiaries. PCAs originate and service short- and intermediate-term loans; FLCAs originate and service long-term real estate mortgage loans; and ACAs originate both long-term and short- and intermediate-term loans.

Key ratios and data reported below, and in the accompanying financial statements, address the financial performance of the District. However, neither the three months nor the six months results of operations may be indicative of an entire year due to the seasonal nature of a portion of District's business.

FORWARD-LOOKING INFORMATION

This quarterly report contains forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict. Words such as "anticipates," "believes," "could," "estimates," "may," "should," "will," or other variations of these terms are intended to identify the forward-looking statements. These statements are based on assumptions and analyses made in light of experience and other historical trends, current conditions, and expected future developments. However, actual results and developments may differ materially from the District's expectations and predictions due to a number of risks and uncertainties, many of which are beyond the District's control. These risks and uncertainties include, but are not limited to:

- political, legal, regulatory, financial markets, and economic conditions and developments in the United States and abroad;
- economic fluctuations in the agricultural, rural infrastructure, international, and farm-related business sectors, as well as in the general economy;
- weather-related, disease, and other adverse climatic or biological conditions that periodically occur that impact agricultural productivity and income of District borrowers;
- changes in United States government support of the agricultural industry and the Farm Credit System (System) as a government-sponsored enterprise (GSE), as well as investor and rating agency reactions to events involving the U.S. government, other GSEs and other financial institutions;
- actions taken by the Federal Reserve System in implementing monetary and fiscal policy, as well as other policies and actions of the federal government that impact the financial services industry and the debt markets;
- credit, interest rate and liquidity risk inherent in lending activities; and
- changes in assumptions for determining the allowance for loan losses, other than temporary impairment and fair value measurements.

FINANCIAL CONDITION

Loan Portfolio

The District's aggregate loan portfolio consists primarily of direct loans made by the Associations to eligible borrowers located within their chartered territories. Bank loans to District Associations have been eliminated in the combined District presentation. Diversification of the loan volume by Farm Credit Administration (FCA) regulatory type is illustrated in the table below. Previously reported amounts for June 30, 2015 have been updated to reflect corrections of FCA loan type classifications. See Note 2, *Loans and Allowance for Loan Losses*, in the Notes to the Combined Financial Statements of this report and Note 3, *Loans and Allowance for Loan Losses*, of the District's 2015 Annual Report for further information.

Loan Portfolio <i>(dollars in thousands)</i>	June 30, 2016		December 31, 2015		June 30, 2015 (as revised)	
Real Estate Mortgage	\$ 12,897,233	47.86%	\$ 12,524,416	47.89%	\$ 11,751,933	47.54%
Production and Intermediate-Term	7,034,004	26.10	6,947,773	26.57	6,718,074	27.17
Rural Residential Real Estate	3,143,704	11.67	3,076,692	11.76	3,077,740	12.45
Processing and Marketing	1,446,317	5.37	1,693,055	6.47	1,492,266	6.04
Loans to Cooperatives	649,862	2.41	256,774	0.98	191,478	0.77
Energy and Water/Waste Disposal	594,212	2.21	504,714	1.93	437,347	1.77
Communication	483,073	1.79	451,028	1.73	365,271	1.48
Farm-Related Business	333,684	1.24	441,461	1.69	435,433	1.76
International	164,067	0.61	70,317	0.27	76,623	0.31
Loans to Other Financing Institutions (OFIs)	130,632	0.48	108,020	0.41	104,633	0.42
Other (including Mission Related)	61,981	0.23	75,317	0.29	67,972	0.27
Lease Receivables	8,390	0.03	3,189	0.01	3,913	0.02
Total	\$ 26,947,159	100.00%	\$ 26,152,756	100.00%	\$ 24,722,683	100.00%

Total loans outstanding were \$26.947 billion at June 30, 2016, an increase of \$794.4 million, or 3.04 percent, compared to total loans outstanding at December 31, 2015 and an increase of \$2.224 billion, or 9.00 percent, since June 30, 2015. The increase in loan volume at June 30, 2016 resulted from improved economic conditions positively impacting borrowers in economically sensitive segments such as forestry, nursery/greenhouse, and borrowers dependent on non-farm income. Row crop farmers have borrowed more for operating needs as a result of lower commodity prices in 2015. Additionally, loan demand over the previous twelve months benefitted from capital expansion in the poultry and swine sectors. Future loan demand is difficult to predict; however, moderate growth is expected for the remainder of 2016.

Credit Quality

Credit quality of the District's loans is shown below:

Classification	Total Loan Portfolio Credit Quality as of:		
	June 30, 2016	December 31, 2015	June 30, 2015
Acceptable	94.58%	94.99%	94.55%
OAEM *	3.05%	2.65%	2.71%
Adverse**	2.37%	2.36%	2.74%

* Other Assets Especially Mentioned

** Adverse loans include substandard, doubtful, and loss loans.

Loan portfolio credit quality at June 30, 2016 declined slightly compared to December 31, 2015 and improved slightly compared to June 30, 2015, as reflected in the table above. The decline since year-end is primarily due to deteriorating asset quality in row crop production resulting from low commodity prices and flooding in limited locations in the District in late 2015. Other sectors experiencing weakness are dairy and beef due to market supply and demand imbalances. As a result, credit quality is anticipated to slightly deteriorate for the remainder of 2016. Over the past twelve months, the incremental improvement of general economic conditions positively impacted forestry, nursery/greenhouse, and borrowers dependent on non-farm income which has helped offset the weakness in the above-mentioned sectors. District real estate values remain stable.

Nonaccrual Loans

Nonaccrual loans represent all loans for which there is a reasonable doubt as to the collection of principal and/or interest under the contractual terms of the loan. Nonaccrual loans for the combined District at June 30, 2016 were \$230.2 million compared to \$252.5 million at December 31, 2015. The decrease of \$22.4 million resulted primarily from repayments of \$45.7 million and reinstatements to accrual status of \$28.8 million, partially offset by loan balances transferred to nonaccrual status of \$55.6 million. At June 30, 2016, total nonaccrual loans were primarily classified in the poultry (14.33 percent of the total), forestry (13.97 percent), field crops (10.03 percent), cattle (8.85 percent), dairy (7.59 percent), and grain (6.82 percent) segments. Nonaccrual loans were 0.85 percent and 0.97 percent of total loans outstanding at June 30, 2016 and December 31, 2015, respectively.

Troubled Debt Restructurings

A troubled debt restructuring (TDR) occurs when a borrower is experiencing financial difficulties and a concession is granted to the borrower that the Bank and District Associations would not otherwise consider. Concessions are granted to borrowers based on either an assessment of the borrower's ability to return to financial viability or a court order. The concessions can be in the form of a modification of terms, rates, or amounts owed. Acceptance of other assets and/or equity as payment may also be considered a concession. The type of alternative financing granted is chosen in order to minimize the loss incurred by the Bank and District Associations. TDRs decreased \$5.6 million since December 31, 2015 and totaled \$207.1 million at June 30, 2016. TDRs at June 30, 2016 were comprised of \$138.9 million of accruing restructured loans and \$68.3 million of nonaccrual restructured loans. Restructured loans were primarily in the forestry (19.05 percent of the total), poultry (12.65 percent), field crops (10.79 percent), and tree fruits and nuts (6.80 percent) segments.

Other Property Owned

Other property owned (OPO) consists primarily of assets once pledged as loan collateral that were acquired through foreclosure or deeded to the Bank and District Associations (or a lender group) in satisfaction of secured loans. OPO may be comprised of real estate, equipment, and equity interests in companies or partnerships. OPO decreased \$7.9 million since December 31, 2015 and totaled \$40.5 million at June 30, 2016. The decrease was due to disposals of \$13.3 million and writedowns of \$2.2 million offset by transfers to OPO of \$7.6 million. The largest OPO holding at June 30, 2016 was in the forestry segment and totaled \$8.0 million (19.85 percent of the total).

Allowance for Loan Losses

The District maintains an allowance for loan losses at a level management considers adequate to provide for probable and estimable credit losses within the loan portfolio as of each reported balance sheet date. Although aggregated in the District's combined financial statements, the allowance for loan losses of each District entity is particular to that institution and is not available to absorb losses realized by other District entities.

The allowance for loan losses was \$183.5 million at June 30, 2016, as compared with \$178.6 million at December 31, 2015, which was an increase of \$4.8 million. Activity which increased the allowance during the six months ended June 30, 2016 included provision expense of \$4.0 million and loan recoveries of \$5.4 million. Offsetting these increases were charge-offs of \$4.6 million. Recoveries during the six month period were related primarily to borrowers in the forestry (25.11 percent of the total), cattle (13.03 percent), nursery/greenhouse (11.16 percent), processing (8.48 percent), field crops (6.89 percent), and poultry (6.74 percent) segments. Charge-offs during the three month period were related primarily to borrowers in the field crops (24.62 percent of the total), poultry (14.62 percent), cattle (8.70 percent), rural home loan (8.21 percent), and cotton (5.66 percent) segments. The allowance at June 30, 2016 included specific reserves of \$20.5 million (11.16 percent of the total) and \$163.0 million (88.84 percent) of general reserves. The largest commodity segments included in the allowance at June 30, 2016 were the field crops (12.60 percent of the total), poultry (11.29 percent), forestry (11.18 percent), grain (8.31 percent), cattle (7.83 percent), and corn (5.66 percent) segments. The allowance for loan losses was 0.68 percent of total loans outstanding at both June 30, 2016 and December 31, 2015. See Note 2, *Loans and Allowance for Loan Losses*, in the Notes to the Combined Financial Statements for further information. See *Provision for Loan Losses* section below for additional details regarding loan loss provision expense and reversals.

Liquidity and Funding Sources

AgFirst and the District Associations maintain adequate liquidity to satisfy the District's daily cash needs. Along with normal cash flows associated with lending operations, the District has two primary sources of liquidity: the capacity to issue Systemwide Debt Securities through the Federal Farm Credit Banks Funding Corporation; and cash and investments. The Bank also maintains several lines of credit with commercial banks, as well as securities repurchase agreement facilities. Providing liquidity for the District's operations is primarily the responsibility of the Bank.

The U.S. government does not guarantee, directly or indirectly, Systemwide Debt Securities. However, the Farm Credit System, as a GSE, has benefited from broad access to the domestic and global capital markets. This access has provided the System with a dependable source of competitively priced debt which is critical for supporting the System's mission of providing credit to agriculture and rural America. The implied link between the credit rating of the System and the U.S. government, given the System's status as a GSE and continued concerns regarding the government's borrowing limit and budget imbalances, could pose risk to the System in the future.

AgFirst's primary source of liquidity comes from its ability to issue Systemwide Debt Securities, which are the general unsecured joint and several obligations of the System banks. AgFirst continually raises funds in the debt markets to support its mission, to repay maturing Systemwide Debt Securities, and to meet other obligations.

The System does not have a guaranteed line of credit from the U.S. Treasury or the Federal Reserve. However, the Farm Credit System Insurance Corporation (FCSIC) has an agreement with the Federal Financing Bank (FFB), a federal instrumentality subject to the supervision and direction of the U.S. Treasury, pursuant to which the FFB could advance funds to the FCSIC. Under its existing statutory authority, the FCSIC may use these funds to provide assistance to the System banks in exigent market circumstances which threaten the banks' ability to pay maturing debt obligations. The agreement provides for advances of up to \$10 billion and terminates on September 30, 2016, unless otherwise renewed. The decision whether to seek funds from the FFB is at the discretion of the FCSIC. Each funding obligation of the FFB is subject to various terms and conditions and, as a result, there can be no assurance that funding would be available if needed by AgFirst or the System.

Currently, Moody's Investor Service and Fitch Ratings have assigned long-term debt ratings for the System of Aaa and AAA and short-term debt ratings of P-1 and F1, respectively. These are the highest ratings available from these rating agencies. Standard & Poor's Ratings Services (S&P) maintains the long-term sovereign credit rating of the U.S. government at AA+, which directly corresponds to its AA+ long-term debt rating of the System. These rating agencies base their ratings on many quantitative and qualitative factors, including the System's status as a GSE. Negative changes to the System's credit ratings could reduce earnings by increasing debt funding costs and could also have a material adverse effect on liquidity, the ability to conduct normal business operations, and the Bank's overall financial condition and results of operations. However, AgFirst anticipates continued access to funding necessary to support the District's and Bank's needs.

On September 25, 2015, S&P affirmed the Bank's AA-/A-1+ long- and short-term issuer credit ratings, the stand-alone credit profile of a+ and the BBB+ preferred stock rating. S&P also revised their outlook on the Bank to negative from stable, reflecting their assessment of the Bank's capital position. On February 5, 2016, S&P revised their outlook on the Bank back to stable from negative based upon additional analysis of the strength of the Bank's capital position. Ratings and outlook for AgFirst by Fitch Ratings remain unchanged at AA-/F1+ and stable.

At June 30, 2016, AgFirst had \$29.068 billion in total debt outstanding compared to \$27.973 billion at December 31, 2015. Debt increased primarily to support a higher level of investment securities and loans as discussed elsewhere in this report.

Cash and cash equivalents, which increased \$256.9 million from December 31, 2015 to a total of \$975.0 million at June 30, 2016, consist primarily of cash on deposit and money market securities that are short-term in nature (from overnight maturities to maturities that range up to 90 days). Incremental movements in cash balances are due primarily to changes in liquidity needs in relation to upcoming debt maturities between reporting periods.

Investment securities totaled \$7.946 billion, or 21.91 percent of total assets at June 30, 2016, compared to \$7.622 billion, or 21.85 percent, as of December 31, 2015. Investment securities increased \$323.9 million, or 4.25 percent, compared to December 31, 2015. Management maintains the available-for-sale liquidity investment portfolio size generally

proportionate with that of the loan portfolio and within regulatory and policy guidelines. In March, 2016, the Bank sold 29 agency mortgage-backed securities totaling \$15.0 million which resulted in gains totaling \$620 thousand. The proceeds were used to purchase one U.S. government guaranteed security. These transactions benefitted the Bank by reducing carrying costs and improving liquidity.

Investment securities classified as being available-for-sale totaled \$7.271 billion at June 30, 2016. Available-for-sale investments at June 30, 2016 included \$142.6 million in U.S. Treasury securities, \$4.077 billion in U.S. government guaranteed securities, \$2.254 billion in U.S. government agency guaranteed securities, \$111.3 million in non-agency collateralized mortgage obligations (CMOs), and \$685.7 million in non-agency asset-backed securities. Since the majority of the portfolio is invested in U.S. government guaranteed and agency securities, the portfolio is highly liquid and potential credit loss exposure is limited.

As of June 30, 2016, AgFirst exceeded all applicable regulatory liquidity requirements. FCA regulations require that the Bank have a liquidity policy that establishes a minimum total “coverage” level of 90 days and that short-term liquidity requirements must be met by certain high quality investments or cash. “Coverage” is defined as the number of days that maturing debt could be funded with eligible cash, cash equivalents, and available-for-sale investments maintained by the Bank.

The FCA classifies eligible liquidity investments according to four liquidity quality levels with level 1 being the highest. The first 15 days of minimum liquidity coverage are met using only level 1 instruments, which include cash and cash equivalents. Days 16 through 30 of minimum liquidity coverage are met using level 1 and level 2 instruments. Level 2 consists primarily of U.S. government guaranteed securities. Days 31 through 90 are met using level 1, level 2, and level 3 securities. Level 3 consists primarily of U.S. agency investments. The fourth level is a supplemental liquidity buffer in excess of the 90-day minimum liquidity reserve which is set to provide coverage to at least 120 days.

At June 30, 2016, AgFirst met each of the individual level criteria above and had a total of 194 days of maturing debt coverage compared to 206 days at December 31, 2015. The decrease resulted from a change in the timing of upcoming debt maturities. Cash provided by the Bank’s operating activities is an additional source of liquidity for the Bank that is not reflected in the coverage calculation.

See Note 3, *Investments*, and Note 4, *Debt*, in the Notes to the Combined Financial Statements for further information.

Capital Resources

Total shareholders’ equity increased \$208.4 million, or 3.67 percent, from December 31, 2015 to a total of \$5.879 billion at June 30, 2016. This increase is primarily attributed to 2016 unallocated retained earnings from net income of \$254.2 million, increases of \$17.5 million employee benefit plans adjustments, and net unrealized gains on investments of \$9.5 million, partially offset by redemption of preferred stock of \$32.9 million, and retained earnings retired of \$40.3 million.

In March and April, 2016, the Bank repurchased through privately negotiated transactions, and subsequently cancelled, Class B Perpetual Non-Cumulative Fixed-to-Floating Rate Subordinated Preferred Stock with a par value of \$45.8 million. The effect of the repurchases on shareholders’ equity was to reduce preferred stock outstanding by \$45.8 million and to increase additional paid-in capital by \$12.9 million. See Note 5, *Shareholders’ Equity*, in the Notes to the Combined Financial Statements for further information.

In March, 2016, the FCA adopted a final rule to modify the regulatory capital requirements for System banks and associations. It is anticipated that the new capital requirements will be effective January 1, 2017. See *Regulatory Matters* section below for further discussion.

RESULTS OF OPERATIONS

Net income for the three months ended June 30, 2016 was \$126.1 million compared to \$136.2 million for the three months ended June 30, 2015, a decrease of \$10.1 million, or 7.43 percent. Net income for the six months ended June 30, 2016 was \$254.2 million compared to \$271.3 million for the corresponding period in 2015, a decrease of \$17.2 million or 6.32 percent. See below for further discussion of change in net income by major components.

Key Results of Operations Comparisons

	Annualized for the six months ended June 30, 2016	For the year ended December 31, 2015	Annualized for the six months ended June 30, 2015
Return on average assets	1.44%	1.63%	1.65%
Return on average shareholders' equity	9.77%	10.34%	10.35%
Net interest margin	2.94%	3.08%	3.13%
Operating expense as a percentage of net interest income and noninterest income	49.00%	47.05%	46.41%
Net (charge-offs) recoveries to average loans	0.01%	0.02%	(0.01)%

The return on average assets and return on average shareholders' equity were negatively impacted in 2016 by a decrease in net income. An increase in average total assets also contributed to the decline in the return on average assets. The lower net interest margin in 2016 also resulted from higher average earning assets in the 2016 period. For the operating expense as a percentage of net interest income and noninterest income ratio, operating expense consists primarily of noninterest expense excluding losses (gains) from other property owned. This ratio was negatively impacted by the decline in income as well as an increase in operating expenses. Net recoveries for the six months ended June 30, 2016 and the year ended December 31, 2015 positively impacted the net (charge-offs) recoveries to average loans ratio. See *Allowance for Loan Losses*, *Net Interest Income*, *Noninterest Income*, and *Noninterest Expenses* sections for further discussion.

Net Interest Income

Net interest income for the three months ended June 30, 2016 was \$253.9 million compared to \$250.2 million for the same period of 2015, an increase of \$3.6 million or 1.45 percent. For the six months ended June 30, 2016, net interest income was \$502.4 million compared to \$498.2 million for the same period of 2015, an increase of \$4.1 million, or 0.83 percent. The net interest margin, which is net interest income as a percentage of average earning assets, was 2.94 percent for both the three and six month periods in 2016, a decrease of 17 and 19 basis points from the three and six month periods of 2015, respectively. The increase in net interest income in both periods resulted primarily from higher average loan balances, but was significantly offset by higher rates paid on interest-bearing liabilities. Higher average balances of interest bearing liabilities also negatively impacted net interest income. During the three and six months periods ended June 30, 2016, the Bank called debt totaling \$5.889 billion and \$9.107 billion, respectively, compared to \$1.362 billion and \$3.404 billion for the same periods in 2015, and was able to lower the cost of funds. Over time, as interest rates change and as assets prepay or reprice, the positive impact on the net interest margin that the Bank has experienced over the last several years from calling debt will continue to diminish.

The effects of changes in volume and interest rates on net interest income for the three and six months ended June 30, 2016, as compared with corresponding periods in 2015, are presented in the following table. The table distinguishes between the changes in interest income and interest expense related to average outstanding balances and to the levels of average interest rates. Accordingly, the benefit derived from funding earning assets with interest-free funds (principally capital) is reflected solely as a volume increase.

<i>(dollars in thousands)</i>	For the three months ended June 30, 2016 vs. June 30, 2015			For the six months ended June 30, 2016 vs. June 30, 2015		
	Increase (decrease) due to changes in:			Increase (decrease) due to changes in:		
	Volume	Rate	Total	Volume	Rate	Total
Interest Income:						
Loans	\$ 24,415	\$ (1,839)	\$ 22,576	\$ 47,602	\$ (2,431)	\$ 45,171
Investments & Cash Equivalents	1,515	385	1,900	2,255	387	2,642
Total Interest Income	25,930	(1,454)	24,476	49,857	(2,044)	47,813
Interest Expense:						
Interest-Bearing Liabilities	7,880	12,977	20,857	13,866	29,811	43,677
Changes in Net Interest Income	\$ 18,050	\$ (14,431)	\$ 3,619	\$ 35,991	\$ (31,855)	\$ 4,136

Provision for Loan Losses

AgFirst and the Associations measure risks inherent in their individual loan portfolios on an ongoing basis and, as necessary, recognize provision for loan loss expense so that appropriate allowances for loan losses are maintained. Provision for loan losses was net expense of \$2.7 million and \$4.0 million for the three and six months periods ended

June 30, 2016, respectively, compared to a net expense of \$3.4 million and \$5.1 million for three and six months ended June 30, 2015. For the three months ended June 30, 2016, the net provision expense consisted of \$3.1 million of general reserve expense partially offset by \$359 thousand of specific reserve reversals. The largest segments included in the net provision expense for the second quarter of 2016 were field crops (\$1.6 million expense), grain (\$1.3 million expense), cotton (\$1.1 million expense), utilities (\$1.0 million expense), forestry (\$2.2 million reversal), and nursery/greenhouse (\$2.0 million reversal). For the six months ended June 30, 2016, the net provision expense consisted of \$6.2 million of general reserve expense partially offset by \$2.2 million of specific reserve reversals. The largest segments included in the net provision expense for the six month period were field crops (\$2.1 million expense), grain (\$1.5 million expense), dairy (\$1.1 million expense), utilities (\$1.0 million expense), forestry (\$2.9 million reversal), and nursery/greenhouse (\$1.6 million reversal). For both periods of 2016, provision expense was impacted by the adoption of an updated System probability of default curve which contained higher probabilities of default. This default curve is utilized in determining the amount of general allowance. See Note 2, *Loans and Allowance for Loan Losses*, in the Notes to the Combined Financial Statements for further information.

Noninterest Income

The following table illustrates the changes in noninterest income:

Change in Noninterest Income <i>(dollars in thousands)</i>	For the three months ended June 30,			For the six months ended June 30,		
	2016	2015	Increase/ (Decrease)	2016	2015	Increase/ (Decrease)
Loan fees	\$ 7,976	\$ 6,963	\$ 1,013	\$ 16,333	\$ 14,856	\$ 1,477
Fees for financially related services	1,717	1,715	2	3,358	3,066	292
Building lease income	876	900	(24)	1,773	1,844	(71)
Net impairment losses on investments	—	(277)	277	(1,730)	(384)	(1,346)
Gains (losses) on investments, net	—	—	—	620	1,126	(506)
Gains (losses) on called debt	(10,729)	(1,681)	(9,048)	(17,937)	(5,985)	(11,952)
Gains (losses) on other transactions	1,227	671	556	1,251	1,386	(135)
Other noninterest income	709	595	114	4,105	3,668	437
Total noninterest income	\$ 1,776	\$ 8,886	\$ (7,110)	\$ 7,773	\$ 19,577	\$ (11,804)

Noninterest income decreased \$7.1 million and \$11.8 million for the three and six months ended June 30, 2016, respectively, compared to the corresponding periods in 2015. For both periods, the decrease was primarily due to higher losses on called debt. For the three month period, higher loan fees and higher gains on other transactions offset some of the decline in noninterest income. For the six month period, higher impairment losses on investments and lower gains on investments also contributed to the decline in noninterest expense, partially offset by higher loan fees. Significant line item variances are discussed further below.

Loan fees increased \$1.0 million and \$1.5 million for the three and six month periods ended June 30, 2016, respectively, compared to the same periods in the prior year. These increases resulted primarily from higher fees on originated loans of \$662 thousand and \$1.0 million for the three and six month periods respectively. The higher fee income was mainly from new loan, commitment, and appraisal fees and reflected an increase in loan originations in 2016.

Higher impairment losses on investments of \$1.3 million for the six months ended June 30, 2016 compared to the prior year resulted primarily from impairment losses recorded in the first quarter of 2016 on four non-agency collateralized mortgage obligation (CMO) securities. The District performs periodic credit reviews, including other-than-temporary impairment analyses, on its entire investment securities portfolio. Estimating credit losses on these types of investments utilizes a number of assumptions and management judgment. The Bank's third party pricing consultant uses the US House Price Index as a significant input to its model. Although home prices have generally been increasing, the loss severities associated with foreclosures and bankruptcies have also been on the increase. The consultant adjusted its model in early 2016 to reflect this pattern of increased loss severities which resulted in increased impairment in the first quarter of 2016. See further discussion in Note 3, *Investments*, in the Notes to the Combined Financial Statements.

For the six months ended June 30, 2016 compared to the corresponding period in 2015, gains on investments decreased \$506 thousand. In March 2016, the Bank sold 29 agency mortgage-backed securities totaling \$15.0 million which resulted in gains totaling \$620 thousand. The proceeds from these sales were used to purchase one U.S. government guaranteed security. In March 2015, the Bank sold 204 agency mortgage-backed securities totaling \$28.0 million which resulted in gains totaling \$1.1 million. The proceeds from these sales were also used to purchase one U.S. government

guaranteed security. These transactions benefitted the Bank by reducing carrying costs and improving liquidity. See discussion of investments in *Liquidity and Funding Sources* section above and in Note 3, *Investments*, in the Notes to the Combined Financial Statements.

Debt issuance expense is amortized over the life of the underlying debt security. When debt securities are called prior to maturity, any unamortized issuance cost is expensed. Losses on called debt increased \$9.0 million and \$12.0 million for the three and six month periods ending June 30, 2016, respectively, compared to the same periods in the prior year. Call options were exercised on bonds totaling \$5.889 billion and \$9.107 billion for the three and six month periods in 2016, respectively, compared to \$1.362 billion and \$3.404 billion for the same periods in 2015. Debt is called to take advantage of favorable market interest rate changes. The amount of debt issuance cost expensed is dependent upon both the volume and remaining maturity of the debt when called. Losses on called debt are more than offset by interest expense savings realized as called debt is replaced by new debt issued at a lower rate of interest.

For the three month period, gains on other transactions increased \$556 thousand primarily as a result of a \$1.1 million increase in the market value of certain retirement plan trust assets and \$808 thousand lower provision expense for unfunded commitments. Changes in the reserve for unfunded commitments result from fluctuations in both the balance and composition of unfunded commitments between periods. These increases were partially offset by a \$1.5 million legal settlement recorded by one Association.

Noninterest Expenses

The following table illustrates the changes in noninterest expense:

Change in Noninterest Expenses	For the three months ended June 30,			For the six months ended June 30,		
	2016	2015	Increase/ (Decrease)	2016	2015	Increase/ (Decrease)
<i>(dollars in thousands)</i>						
Salaries and employee benefits	\$ 78,760	\$ 75,415	\$ 3,345	\$ 156,576	\$ 152,064	\$ 4,512
Occupancy and equipment	10,103	9,768	335	20,140	19,741	399
Insurance Fund premiums	9,477	7,202	2,275	18,611	14,161	4,450
Other operating expenses	27,146	27,059	87	54,633	54,350	283
Losses (gains) from other property owned	1,358	(391)	1,749	1,737	140	1,597
Total noninterest expenses	\$ 126,844	\$ 119,053	\$ 7,791	\$ 251,697	\$ 240,456	\$ 11,241

Noninterest expense increased \$7.8 million and \$11.2 million for the three and six months ended June 30, 2016, respectively, compared to the corresponding period in 2015. For both periods, the increase was due primarily to an increase in salaries and employee benefits, higher insurance fund premiums, and increased losses on other property owned. Significant line item variances are discussed further below.

Salaries and employee benefits increased \$3.3 million and \$4.5 million for the three and six month periods, respectively. These increases resulted primarily from \$3.0 million and \$5.2 million, respectively, in higher salaries and incentives due mainly to normal salary administration.

Insurance Fund premiums increased \$2.3 million and \$4.5 million for the three and six month periods ended June 30, 2016, respectively, compared to the same periods in 2015. These increases resulted primarily from an increase in the base annual premium rate to 16 basis points in 2016 from 13 basis points in 2015. The FCSIC Board makes premium rate adjustments, as necessary, to maintain their secure base amount which is based upon insured debt outstanding at System banks. Effective July 1, 2016, the base annual premium rate increased to 18 basis points.

Losses on other property owned increased \$1.7 million and \$1.6 million for the three and six month periods in 2016, respectively, compared with the same periods in the prior year. The increased losses for both the three and six months periods reflected higher writedowns and lower gains on sales of OPO for the second quarter of 2016 compared to the prior year. See *Other Property Owned* section above for further information.

REGULATORY MATTERS

On March 10, 2016, the FCA adopted a final regulation to modify the regulatory capital requirements for System banks and associations. The stated objectives of the rule are as follows:

- To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as a government-sponsored enterprise,
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System,
- To make System regulatory capital requirements more transparent, and
- To meet the requirements of section 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).

The final rule will replace existing core surplus and total surplus requirements with Common Equity Tier 1, Tier 1 and Total Capital risk-based capital ratio requirements. The final rule will also replace the existing net collateral ratio with a Tier 1 Leverage ratio and is applicable to all banks and associations. The Permanent Capital Ratio will remain in effect with the final rule. The following sets forth the new regulatory capital ratios:

Ratio	Primary Components of Numerator	Denominator	Minimum Requirement	Minimum Requirement with Conservation Buffer
Common Equity Tier 1 (CET1) Capital	Unallocated retained earnings/surplus (URE), Common Stock (subject to certain conditions)	Risk-weighted assets	4.5%	7.0%
Tier 1 Capital	CET1 Capital, Non-cumulative perpetual preferred stock	Risk-weighted assets	6.0%	8.5%
Total Capital	Tier 1 Capital, Allowance for Loan Losses, other equity securities not included in Tier 1 Capital	Risk-weighted assets	8.0%	10.5%
Tier 1 Leverage	Tier 1 Capital (1.5% must be URE or URE equivalents)	Total assets	4.0%	5.0%

On July 28, 2016, the FCA published the final regulation in the Federal Register, and it is anticipated that the effective date of the new capital requirements will be January 1, 2017, with a three-year phase-in of the capital conservation buffer applied to the risk-adjusted capital ratios. District institutions are well-positioned to be in compliance with the new requirements at adoption.

On November 30, 2015, the FCA, along with four other federal agencies, published in the Federal Register a final rule to establish capital and margin requirements for covered swap entities as required by the Dodd-Frank Act. See below for further information regarding the Dodd-Frank Act.

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The FCA expects to issue a final regulation in 2016. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations,
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption,
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers,
- To comply with the requirements of section 939A of the Dodd-Frank Act,
- To modernize the investment eligibility criteria for System banks, and
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

FINANCIAL REGULATORY REFORM

See discussion of the Dodd-Frank Act in the Financial Regulatory Reform section of the 2015 Annual Report of AgFirst Farm Credit Bank and District Associations.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 1, Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements, in the Notes to the Combined Financial Statements, and the 2015 Annual Report of AgFirst Farm Credit Bank and District Associations for recently issued accounting pronouncements.

NOTE: Shareholder investment in a District Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, Reporting Manager, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Combined information concerning AgFirst Farm Credit Bank and District Associations can also be obtained at the Bank's website, www.agfirst.com. AgFirst prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no quarterly report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

Notes to the Combined Financial Statements

(unaudited)

Note 1 — Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements

Organization

The accompanying combined financial statements include the accounts of AgFirst Farm Credit Bank (AgFirst or Bank) and its related Agricultural Credit Associations (Associations or District Associations), collectively referred to as the AgFirst District (District). A complete description of the organization and operations, the significant accounting policies followed, and the financial condition and results of operations of the District as of and for the year ended December 31, 2015 are contained in the 2015 Annual Report to Shareholders. These unaudited interim financial statements should be read in conjunction with the latest Annual Report to Shareholders.

Basis of Presentation

In the opinion of management, the accompanying combined financial statements contain all adjustments necessary for a fair statement of results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed.

Certain amounts in the prior period's combined financial statements have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The results of any interim period are not necessarily indicative of those to be expected for a full year.

Significant Accounting Policies

The District's accounting and reporting policies conform with U.S. generally accepted accounting principles (GAAP) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates based on assumptions about future economic and market conditions (for example, unemployment, market liquidity, real estate prices, etc.) that affect the reported amounts of assets and liabilities at the date of the financial statements, income and expenses during the reporting period, and the related disclosures. Although these estimates contemplate current conditions and expectations of change in the future, it is reasonably possible that actual conditions may be different than anticipated, which could materially affect results of operations and financial condition.

Management has made significant estimates in several areas, including loans and allowance for loan losses (Note 2, *Loans and Allowance for Loan Losses*), investment securities and other-than-temporary impairment (Note 3, *Investments*), and financial instruments (Note 6, *Fair Value Measurement*). Actual results could differ from those estimates.

For further details of significant accounting policies, see Note 2, *Summary of Significant Accounting Policies*, from the latest Annual Report.

Accounting Standards Updates (ASUs) Issued During the Period

The following ASUs were issued by the Financial Accounting Standards Board (FASB) since the most recent Annual Report:

- In June, 2016, the FASB issued ASU 2016-13 Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The Update improves financial reporting by requiring timelier recording of credit losses on financial instruments. It requires an organization to measure all expected credit losses for financial assets held at the reporting date. Financial institutions and other organizations will use forward-looking information to better estimate their credit losses. Many of the loss estimation techniques applied today will still be permitted, although the inputs to those techniques will change to reflect the full amount of expected credit losses. Organizations will continue to use judgment to determine which loss estimation method is appropriate for their circumstances. The ASU requires enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. Additionally, the ASU amends the

accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The Update will take effect for U.S. Securities and Exchange Commission (SEC) filers for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. For public companies that are not SEC filers, it will take effect for fiscal years beginning after December 15, 2020, and interim periods within those fiscal years. For all other organizations, the ASU will take effect for fiscal years beginning after December 15, 2020, and for interim periods within fiscal years beginning after December 15, 2021. Early application will be permitted for all organizations for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018.

- In May, 2016, the FASB issued ASU 2016-12 Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients. The guidance addresses certain issues identified by the Transition Resource Group (TRG) in the guidance on assessing collectibility, presentation of sales taxes, noncash consideration, and completed contracts and contract modifications at transition. The effective date and transition requirements for the amendments in this Update are the same as the effective date and transition requirements for Topic 606 (and any other Topic amended by Update 2014-09).
- In April, 2016, the FASB issued ASU 2016-10 Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing. The Update clarifies the following two aspects of Topic 606: identifying performance obligations and the licensing implementation guidance, while retaining the related principles for those areas. The effective date and transition requirements for the amendments in this Update are the same as the effective date and transition requirements for Topic 606 (and any other Topic amended by Update 2014-09).
- In March, 2016, the FASB issued ASU 2016-08 Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net). The amendments clarify the implementation guidance on principal versus agent considerations. The effective date and transition requirements for the amendments in this Update are the same as the effective date and transition requirements for Topic 606 (and any other Topic amended by Update 2014-09).
- In March, 2016, the FASB issued ASU 2016-07 Investments – Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting. To simplify the accounting for equity method investments, the amendments in the Update eliminate the requirement that an entity retroactively adopt the equity method of accounting if an investment qualifies for use of the equity method as a result of an increase in the level of ownership or degree of influence. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor’s previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. The guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Earlier application is permitted. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method.
- In March, 2016, the FASB issued ASU 2016-06 Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments. Topic 815 requires that embedded derivatives be separated from the host contract and accounted for separately as derivatives if certain criteria are met, including the “clearly and closely related” criterion. The amendments in this Update clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. An entity performing the assessment under the amendments is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. The amendments apply to all entities that are issuers of or investors in debt instruments (or hybrid financial instruments that are determined to have a debt host) with embedded call (put) options. For public business entities, the amendments are effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. The amendments are to be applied on a modified retrospective basis to existing debt instruments as of the beginning of the fiscal year for which the amendments are effective. Early adoption is permitted, including adoption in an interim period. If an entity early adopts the amendments in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes that interim period.
- In March, 2016, the FASB issued ASU 2016-05 Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships. The term novation refers to replacing one

counterparty to a derivative instrument with a new counterparty. That change occurs for a variety of reasons, including financial institution mergers, intercompany transactions, an entity exiting a particular derivatives business or relationship, an entity managing against internal credit limits, or in response to laws or regulatory requirements. The amendments clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under Topic 815, does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. For public business entities, the amendments are effective for financial statements issued for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. Entities have an option to apply the amendments on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period.

ASUs Pending Effective Date

For a detailed description of the ASUs below, see the latest Annual Report.

Potential effects of ASUs issued in previous periods:

- 2016-02 Leases (Topic 842): In February, 2016, the FASB issued an update that requires organizations that lease assets to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. The District is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- 2016-01 Financial Instruments – Overall (Subtopic 825-10) Recognition and Measurement of Financial Assets and Financial Liabilities: In January, 2016, the FASB issued an update that is intended to improve the recognition and measurement of financial instruments. The District is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.
- 2015-14 Revenue from Contracts with Customers (Topic 606) – Deferral of the Effective Date: In August, 2015, the FASB issued an update that defers by one year the effective date of ASU 2014-09, Revenue from Contracts with Customers. The new ASU reflects decisions reached by the FASB at its meeting on July 9, 2015. The District is in the process of evaluating what effects the guidance may have on the statements of financial condition and results of operations.

Accounting Standards Effective During the Period

There were no changes in the accounting principles applied from the latest Annual Report, other than any discussed below.

No recently adopted accounting guidance issued by the FASB had a significant effect on the current period reporting. See the most recent Annual Report for a detailed description of each of the standards below:

- 2015-07 Fair Value Measurement (Topic 820): Disclosure for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) –The amendment was adopted prospectively. There were no changes to the District’s statements of financial condition or results of operations as a result of this guidance. See Note 6, *Fair Value Measurement*, for the disclosures required by this guidance.
- 2015-01 Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items – The amendment was adopted retrospectively. There were no changes to the District’s statements of financial condition or results of operations as a result of this guidance.
- 2014-15 Income Statement – Presentation of Financial Statements – Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern: This amendment is effective for the annual reporting period ended December 31, 2016 and interim and annual periods thereafter. It may require additional disclosures but will not have a material impact on the District’s financial condition or results of operations.

Note 2 — Loans and Allowance for Loan Losses

The District maintains an allowance for loan losses at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the District has been identified. See Note 3, *Loans and Allowance for Loan Losses*, from the latest Annual Report for further discussion.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. The District manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Bank and each Association sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the boards of directors.

A summary of loans outstanding at period end follows:

<i>(dollars in thousands)</i>	June 30, 2016	December 31, 2015
Real estate mortgage	\$ 12,897,233	\$ 12,524,416
Production and intermediate-term	7,034,004	6,947,773
Loans to cooperatives	649,862	256,774

AgFirst Farm Credit Bank and District Associations

A summary of changes in the allowance for loan losses and recorded investment in loans for each reporting period follows. Prior to issuance of the District's 2015 Annual Report, management identified errors in classification of the loan portfolio among the various FCA loan type categories that are used to report disaggregated loan information in footnote disclosures. As discussed in Note 3, *Loans and Allowance for Loan Losses*, of the District's 2015 Annual Report, FCA loan type classifications prior to December 31, 2015 have been revised as necessary to reflect these loan type classifications, as adjusted. In the table below, activity for the quarter and six months ended June 30, 2015 is presented as revised.

<i>(dollars in thousands)</i>	Real Estate Mortgage	Production and Intermediate- term	Agribusiness*	Communication	Energy and Water/Waste Disposal	Rural Residential Real Estate	International	Lease Receivables	Other Loans **	Total

* Includes the loan types: Loans to cooperatives, Processing and marketing, and Farm-related business.

** Includes mission related loans and loans to OFIs.

*** Purchased credit impaired loans.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented. The tables do not include any purchased credit impaired (PCI) loans. In the tables below, activity for the quarter and six months ended June 30, 2015 is presented as revised for FCA loan type reclassifications discussed above.

The following table presents foreclosure information as of period end:

	June 30, 2016	December 31, 2015		
Carrying amount of foreclosed residential real estate properties held as a result of obtaining physical possession	\$	1,951	\$	2,378
Recorded investment of consumer mortgage loans secured by residential real estate for which formal foreclosure proceedings are in process	\$	1,677	\$	1,669

PCI Loans

For further discussion of the District's accounting for PCI loans, see Note 2, *Summary of Significant Accounting Policies*, of the District's most recent Annual Report.

In connection with past mergers, certain Associations purchased impaired loans that are not accounted for as debt securities. The carrying amounts of those loans included in the balance sheet amounts of loans receivable at June 30, 2016, were as follows.

<i>(dollars in thousands)</i>	
Real estate mortgage	\$ 2,062
Rural residential real estate	49
Total Loans	\$ 2,111

At both June 30, 2016 and December 31, 2015, there was no allowance for loan losses related to these loans. During the three and six months ended June 30, 2016, provision for loan losses on these loans was an expense reversal of \$216 thousand and an expense reversal of \$293 thousand, respectively, compared with an expense reversal of \$56 thousand and an expense reversal of \$96 thousand for the three and six month periods ended June 30, 2015. See above for a summary of changes in the total allowance for loan losses for the period ended June 30, 2016. There were no loans acquired for 2016 or 2015 for which it was probable at acquisition that all contractually required payments would not be collected.

Certain loans that are within the scope of purchased impaired loan guidance are accounted for using a cash basis method of income recognition because the acquiring Associations could not reasonably estimate cash flows expected to be collected. Substantially all of the loans acquired were real estate collateral dependent loans. At the time of purchase, the real estate markets were very unpredictable, making estimation of the amount and timing of a sale of loan collateral in essentially the same condition as received upon foreclosure indeterminate. As such, the acquiring Associations did not have the information necessary to reasonably estimate cash flows expected to be collected to compute their yield.

Note 3 — Investments

Investment Securities

District investments consist primarily of mortgage-backed securities (MBSs) collateralized by U.S. government or U.S. agency guaranteed residential and commercial mortgages. They are held to maintain a liquidity reserve, manage short-term surplus funds, and manage interest rate risk. These securities meet the applicable FCA regulatory guidelines related to government agency guaranteed investments.

Included in the available-for-sale investments are non-agency collateralized mortgage obligations (CMOs) and asset-backed securities (ABSs). These securities must meet the applicable FCA regulatory guidelines, which require them to be high quality, senior class, and rated in the top category (AAA/Aaa) by Nationally Recognized Statistical Rating Organizations (NRSROs) at the time of purchase. To achieve these ratings, the securities may have a guarantee of timely payment of principal and interest, credit enhancements achieved through over-collateralization or other means, priority of payments for senior classes over junior classes, or bond insurance. All of the non-agency securities owned have one or more credit enhancement features.

The FCA considers a non-agency security ineligible if it falls below AAA/Aaa credit rating criteria and requires Farm Credit System (System) institutions to provide notification to the FCA when a security becomes ineligible. Non-agency CMO and ABS securities not rated in the top category by at least one of the NRSROs at June 30, 2016 had a fair value of \$110.4 million and \$29.7 million, respectively.

Held-to-maturity investments consist of Mission Related Investments acquired primarily under the Rural Housing Mortgage-Backed Securities (RHMS) and Rural America Bond (RAB) pilot programs. RHMS must be fully guaranteed by a government agency or government sponsored enterprise. RABs are private placement securities which generally have some form of credit enhancement.

Held-to-maturity securities also include ABSs issued through the Small Business Administration and guaranteed by the full faith and credit of the United States government. They are held for managing short-term surplus funds and reducing interest rate risk. These securities meet the applicable FCA regulatory guidelines related to government agency guaranteed investments.

In its Conditions of Approval for the program, the FCA considers an RAB ineligible if its investment rating, based on the internal 14-point risk rating scale used to also grade loans, falls below 9. The FCA requires System institutions to provide notification when a security becomes ineligible. At June 30, 2016, the District held three RABs whose credit quality had deteriorated beyond the program limits.

Effective December 31, 2014, the FCA ended the pilot programs approved after 2004 as part of the Investment in Rural America initiative. Each institution participating in such programs may continue to hold its investment through the maturity dates for the investments, provided the institution continues to meet all approval conditions. The FCA can consider future participation in these programs on a case-by-case basis.

An agreement with a commercial bank requires AgFirst to maintain \$50.0 million as a compensating balance. In 2015, the Bank purchased \$42.4 million in U.S. Treasury securities which are held for that purpose. The remainder of the compensating balance is held in cash in a demand deposit account. These securities are excluded when calculating the amount of eligible liquidity investments.

During the first six months of 2016, proceeds from sales of investments were \$16.0 million and realized gains were \$620 thousand. During the first six months of 2015, proceeds from sales of investments were \$29.1 million and realized gains were \$1.1 million.

Available-for-sale

A summary of the amortized cost and fair value of debt securities held as available-for-sale investments follows:

	June 30, 2016				
<i>(dollars in thousands)</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield

A substantial portion of these investments has contractual maturities in excess of ten years. However, expected maturities for these types of securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. This also applies to those securities other-than-temporarily impaired for which a credit loss has been recognized but noncredit-related losses continue to remain unrealized. The following tables show the fair value and gross unrealized losses for all investments that have been in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

<i>(dollars in thousands)</i>	June 30, 2016					
	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

ABSs	601,682	(962)	7,121	(478)	608,803	(1,440)
RABs and Other	49,318	(1,658)	10,761	(604)	60,079	(2,262)
Total	\$ 2,687,735	\$ (15,077)	\$ 1,066,954	\$ (25,196)	\$ 3,754,689	\$ (40,273)

The recording of an impairment is predicated on: (1) whether or not management intends to sell the security, (2) whether it is more likely than not that management would be required to sell the security before recovering its costs, and (3) whether management expects to recover the security's entire amortized cost basis (even if there is no intention to sell). If the District intends to sell the security or it is more likely than not that it would be required to sell the security, the impairment loss recognized equals the full difference between amortized cost and fair value of the security. When the District does not intend to sell securities in an unrealized loss position and it is not more likely than not that it would be required to sell the securities, other-than-temporary impairment loss is separated into credit loss and noncredit loss. Credit loss is defined as the shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis.

The District performs periodic credit reviews, including other-than-temporary impairment (OTTI) analyses, on its investment securities portfolio. The objective is to quantify future possible loss of principal or interest due on securities in the portfolio. Factors considered in determining whether an impairment is other-than-temporary include among others: (1) the length of time and the extent to which the fair value is less than cost, (2) adverse conditions specifically related to the industry, (3) geographic area and the condition of the underlying collateral, (4) payment structure of the security, (5) ratings by rating agencies, (6) the creditworthiness of bond insurers, and (7) volatility of the fair value changes.

The District uses the present value of cash flows expected to be collected from each debt security to determine the amount of credit loss. This technique requires assumptions related to the underlying collateral, including default rates, amount and timing of prepayments, and loss severity. Assumptions can vary widely from security to security and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics, and collateral type.

Significant inputs used to estimate the amount of credit loss include, but are not limited to, performance indicators of the underlying assets in the security (including default rates, delinquency rates, and percentage of nonperforming assets), loan-to-collateral value ratios, third-party guarantees, current levels of subordination, vintage, geographic concentration, and credit ratings. The District obtains assumptions for the default rate, prepayment rate, and loss severity rate from an independent third party.

Following are the assumptions used for the periods ended:

Assumptions Used	MBSs	ABSs
June 30, 2016		
Default rate by range	1.36% to 22.06%	19.13% to 33.61%
Prepayment rate by range	3.60% to 11.93%	2.71% to 11.11%
Loss severity by range	12.83% to 78.78%	84.28% to 100.73%
December 31, 2015		
Default rate by range	1.24% to 25.28%	24.03% to 39.76%
Prepayment rate by range	3.11% to 15.56%	2.35% to 10.41%
Loss severity by range	4.37% to 59.66%	86.04% to 100.65%

Based on the results of all analyses, the District has recognized \$1.7 million of credit-related OTTI for 2016, which is included in Net Other-than-temporary Impairment Losses in the Combined Statements of Income. Since the District does not intend to sell these other-than-temporarily impaired debt securities and is not more likely than not to be required to sell before recovery, the total OTTI is reflected in the Statements of Income with: (1) a net other-than-temporary impairment amount related to estimated credit loss, and (2) an amount relating to all other factors, recognized as a reclassification to or from Other Comprehensive Income.

For the six months ended June 30, 2016, net unrealized gains of \$10.7 million were recognized in other comprehensive income on available-for-sale investments that are not other-than-temporarily impaired.

The following schedule details the activity related to cumulative credit losses on investments recognized in earnings for which a portion of an other-than-temporary impairment was recognized in other comprehensive income:

<i>(dollars in thousands)</i>	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Amount related to credit loss-beginning balance	\$ 60,277	\$ 60,187	\$ 59,226	\$ 60,217
Additions for initial credit impairments	—	—	—	—
Additions for subsequent credit impairments	—	106	1,730	213
Reductions for increases in expected cash flows	(1,048)	(696)	(1,727)	(833)
Reductions for securities sold/settled/matured	—	—	—	—
Amount related to credit loss-ending balance	59,229	59,597	59,229	59,597
Life to date incurred credit losses	(22,073)	(20,111)	(22,073)	(20,111)
Remaining unrealized credit losses	\$ 37,156	\$ 39,486	\$ 37,156	\$ 39,486

For all other impaired investments, the District has not recognized any credit losses as the impairments are deemed temporary and result from non-credit related factors. The District has the ability and intent to hold these investments until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities. Substantially all of these investments were in U.S. government agency securities and the District expects these securities would not be settled at a price less than their amortized cost.

Note 4 — Debt

Bonds and Notes

AgFirst, unlike commercial banks and other depository institutions, obtains funds for its lending operations primarily from the sale of Systemwide Debt Securities issued jointly by the System banks through the Funding Corporation. Certain conditions must be met before AgFirst can participate in the issuance of Systemwide Debt Securities. As one condition of participation, AgFirst is required by the Farm Credit Act and FCA regulations to maintain specified eligible assets at least equal in value to the total amount of debt obligations outstanding for which it is primarily liable. This requirement does not provide holders of Systemwide Debt Securities with a security interest in any assets of the banks.

In accordance with FCA regulations, each issuance of Systemwide Debt Securities ranks equally with other unsecured Systemwide Debt Securities. Systemwide Debt Securities are not issued under an indenture and no trustee is provided with respect to these securities. Systemwide Debt Securities are not subject to acceleration prior to maturity upon the occurrence of any default or similar event.

The System may issue the following types of Systemwide Debt Securities:

- Federal Farm Credit Banks Consolidated Systemwide Bonds,
- Federal Farm Credit Banks Consolidated Systemwide Discount Notes,
- Federal Farm Credit Banks Consolidated Systemwide Master Notes,
- Federal Farm Credit Banks Global Debt Securities, and
- Federal Farm Credit Banks Consolidated Systemwide Medium-Term Notes.

Additional information regarding Systemwide Debt Securities can be found in their respective offering circulars.

The following table provides a summary of AgFirst's participation in outstanding Systemwide Debt Securities by maturity. Weighted average interest rates include the effect of related derivative financial instruments. The table does not include \$678.3 million of intra-system obligations.

<i>(dollars in thousands)</i>	June 30, 2016					
	Bonds		Discount Notes		Total	
	Amortized Cost	Weighted Average Interest Rate	Amortized Cost	Weighted Average Interest Rate	Amortized Cost	Weighted Average Interest Rate
Maturities						
One year or less	\$ 6,591,944	1.00%	\$ 8,352,514	0.55%	\$ 14,944,458	0.75%
Greater than one year to two years	5,303,157	0.77	—	—	5,303,157	0.77
Greater than two years to three years	2,397,339	1.07	—	—	2,397,339	1.07
Greater than three years to four years	1,451,785	1.55	—	—	1,451,785	1.55
Greater than four years to five years	1,320,897	1.65	—	—	1,320,897	1.65
Greater than five years	3,650,826	2.37	—	—	3,650,826	2.37
Total	\$ 20,715,948	1.27%	\$ 8,352,514	0.55%	\$ 29,068,462	1.06%

Discount notes are issued with maturities ranging from 1 to 365 days. The average maturity of discount notes at June 30, 2016 was 161 days.

Note 5 — Shareholders' Equity

Perpetual Preferred Stock

Payment of dividends or redemption price on issued Preferred Stock may be restricted if the Bank fails to satisfy applicable minimum capital adequacy, surplus, and collateral requirements.

In April, 2016, the Bank repurchased through a privately negotiated transaction, and subsequently cancelled, Class B Perpetual Non-Cumulative Fixed-to-Floating Rate Subordinated Preferred Stock with a par value of \$41.8 million. The effect of the repurchase on shareholders' equity was to reduce preferred stock outstanding by \$41.8 million and to increase additional paid-in capital by \$11.7 million.

In March, 2016, the Bank repurchased through a privately negotiated transaction, and subsequently cancelled, Class B Perpetual Non-Cumulative Fixed-to-Floating Rate Subordinated Preferred Stock with a par value of \$4.0 million. The effect of the repurchase on shareholders' equity was to reduce preferred stock outstanding by \$4.0 million and to increase additional paid-in capital by \$1.2 million.

In August, 2015, the Bank repurchased through a privately negotiated transaction, and subsequently cancelled, Class B Perpetual Non-Cumulative Fixed-to-Floating Rate Subordinated Preferred Stock with a par value of \$10.3 million. The effect of the repurchase on shareholders' equity was to reduce preferred stock outstanding by \$10.3 million and to increase additional paid-in-capital by \$3.4 million.

(a) Amounts in parentheses indicate debits to AOCI.

(b) Amounts in parentheses indicate debits to profit/loss.

Note 6 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

The classifications within the fair value hierarchy are as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. Level 1 assets and liabilities could include investment securities and derivative contracts that are traded in an active exchange market, in addition to certain U.S. Treasury securities that are highly-liquid and are actively traded in over-the-counter markets.

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. Level 2 assets and liabilities could include investment securities that are traded in active, non-exchange markets and derivative contracts that are traded in active, over-the-counter markets.

Level 3 inputs are unobservable and supported by little or no market activity. Level 3 assets and liabilities could include investments and derivative contracts whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, and other instruments for which the determination of fair value requires significant management judgment or estimation. Level 3 assets and liabilities could also include investments and derivative contracts whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

For a complete discussion of the inputs and other assumptions considered in assigning various assets and liabilities to the fair value hierarchy levels, see the most recent Annual Report to Shareholders.

In 2009, the Bank began adjusting the pricing it received for the Non-Agency ABS and CMO securities from the third party pricing service with that obtained from an investment analysis consultant due to the inherent illiquidity and dislocation in the market for these bonds. At that time, these securities were also reclassified and reported as Level 3 fair value measurements because of this market unobservable pricing input. Over time, this valuation input was discontinued because of a reduction in volatilities and risk, as measured by the pricing differences and changes over time, for these bonds. Documentation from the third party pricing service indicates market observable inputs are used in their valuations of these securities. On June 30, 2015, the Non-Agency ABS and CMO bonds were transferred to Level 2 of the fair value hierarchy.

The following table presents the changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the periods presented. Except as described above, the District had no transfers of assets or liabilities measured on a recurring basis into or out of Level 1 or Level 2 during the reporting period.

<i>(dollars in thousands)</i>	ABSs	Non-Agency CMOs
Balance at December 31, 2014	\$ 34,783	\$ 153,011
Gains or (losses) included in earnings	-	(213)
Gains or (losses) included in OCI	(153)	1,910
Purchases	-	-
Sales	-	-
Settlements	(1,088)	(13,909)
Transfers in and/or out of Level 3	(33,542)	(140,799)
Balance at June 30, 2015	<u>\$ -</u>	<u>\$ -</u>

Fair values are estimated at each period end date for assets and liabilities measured at fair value on a recurring basis. Fair values are estimated at least annually, or when information suggests a significant change in value, for assets measured at fair value on a nonrecurring basis. Other Financial Instruments are not measured at fair value in the statement of financial position, but their fair values are estimated as of each period end date. The following tables summarize the carrying amounts of these assets and liabilities at period end, and their related fair values.

SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

Investment Securities

The fair values of predominantly all Level 3 investment securities have consistent inputs, valuation techniques and correlation to changes in underlying inputs. The models used to determine fair value for these instruments use certain significant unobservable inputs within a discounted cash flow or market comparable pricing valuation technique. Such inputs generally include discount rate components including risk premiums, prepayment estimates, default estimates and loss severities.

These Level 3 assets would decrease (increase) in value based upon an increase (decrease) in discount rates, defaults, or loss severities. Conversely, the fair value of these assets would generally increase (decrease) in value if the prepayment input were to increase (decrease).

Generally, a change in the assumption used for defaults is accompanied by a directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayments. Unobservable inputs for loss severities do not normally increase or decrease based on movements in the other significant unobservable inputs for these Level 3 assets.

Derivative Instruments

Level 3 derivative instruments consist of forward contracts that represent a hedge of an unrecognized firm commitment to purchase agency securities at a future date. The value of the forward is the difference between the fair value of the security at inception of the forward and the measurement date. Significant inputs for these valuations would be discount rate and volatility. These Level 3 derivatives would decrease (increase) in value based upon an increase (decrease) in the discount rate.

Generally, for derivative instruments which are subject to changes in the value of the underlying referenced instrument, change in the assumption used for default rate is accompanied by directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayment rates.

Unobservable inputs for discount rate and volatility do not increase or decrease based on movements in other significant unobservable inputs for these Level 3 instruments.

Inputs to Valuation Techniques

Management determines the District's valuation policies and procedures. Internal valuation processes are calibrated annually by an independent consultant. Fair value measurements are analyzed on a periodic basis. Documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing.

Quoted market prices are generally not available for the instruments presented below. Accordingly, fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fair Value	Valuation Technique(s)	Unobservable Input	Range
Forward contracts – when-issued securities	\$ –	Broker/Consensus pricing	Offered quotes	None outstanding
Impaired loans and other property owned	\$ 395,064	Appraisal	Income and expense	*
			Comparable sales	*
			Replacement cost	*
			Comparability adjustments	*
Other investments – RBIC	\$ –	Third party evaluation	Income, expense, capital	Not applicable

** Ranges for this type of input are not useful because each collateral property is unique.*

Information about Recurring and Nonrecurring Level 2 Fair Value Measurements

	Valuation Technique(s)	Input
Investments available-for-sale	Discounted cash flow	Constant prepayment rate Probability of default Loss severity
	Quoted prices Vendor priced	Price for similar security **
Federal funds sold, securities purchased under resale agreements and other	Carrying value	Par/principal and appropriate interest yield
Interest rate swaps	Discounted cash flow	Annualized volatility Counterparty credit risk Own credit risk

** The inputs used to estimate fair value for assets and liabilities that are obtained from third party vendors are not included in the table as the specific inputs applied are not provided by the vendor.

Information about Other Financial Instrument Fair Value Measurements

	Valuation Technique(s)	Input
Loans	Discounted cash flow	Prepayment forecasts Probability of default Loss severity
Cash and cash equivalents	Carrying value	Par/principal and appropriate interest yield
RABs and other	Discounted cash flow	Risk adjusted spread Prepayment rates Probability of default Loss severity
Assets held in trust funds	Quoted prices	Price for identical security
Bonds and notes	Discounted cash flow	Benchmark yield curve Derived yield spread Own credit risk
Cash collateral	Carrying value	Par/principal and appropriate interest yield

Note 7 — Employee Benefit Plans

Following are retirement and other postretirement benefit expenses for the District:

<i>(dollars in thousands)</i>	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Pension	\$ 12,076	\$ 11,067	\$ 24,153	\$ 22,134
401k	2,890	2,694	6,117	5,666
Other postretirement benefits	3,285	4,259	6,571	8,518
Total	\$ 18,251	\$ 18,020	\$ 36,841	\$ 36,318

Following are retirement and other postretirement benefit contributions for the District. Projections are based upon actuarially determined amounts as of the most recent measurement date of December 31, 2015.

<i>(dollars in thousands)</i>	Actual YTD Through 6/30/16	Projected Contributions for Remainder of 2016	Projected Total Contributions 2016
Pensions	\$ 541	\$ 33,616	\$ 34,157
Other postretirement benefits	3,590	3,751	7,341
Total	\$ 4,131	\$ 37,367	\$ 41,498

Contributions in the above table include allocated estimates of funding for multi-employer plans in which the District participates. These amounts may change when a total funding amount and allocation is determined by the respective Plans' Sponsor Committees. Also, market conditions could impact discount rates and return on plan assets which could change contributions necessary before the next plan measurement date of December 31, 2016.

Further details regarding employee benefit plans are contained in the most recent Annual Report to Shareholders, including a discussion of benefit plan changes related to the termination of the AgFirst Farm Credit Cash Balance Retirement Plan.

Note 8 — Commitments and Contingencies

Under the Farm Credit Act of 1971, each System bank is primarily liable for its portion of Systemwide bond and discount note obligations. Additionally, the four banks are jointly and severally liable for the bonds and notes of the other System banks under the terms of the Joint and Several Liability Allocation Agreement. Published in the Federal Register, the agreement prescribes the payment mechanisms to be employed in the event one of the banks is unable to meet its debt obligations.

In the event a bank is unable to timely pay principal or interest on an insured debt obligation for which the bank is primarily liable, the Farm Credit System Insurance Corporation (FCSIC) must expend amounts in the Insurance Fund to the extent available to ensure the timely payment of principal and interest on the insured debt obligation. The provisions of the Farm Credit Act providing for joint and several liability of the banks on the obligation cannot be invoked until the amounts in the Insurance Fund have been exhausted. However, because of other mandatory and discretionary uses of the Insurance Fund, there is no assurance that there will be sufficient funds to pay the principal or interest on the insured debt obligation.

Once joint and several liability provisions are initiated, the FCA is required to make “calls” to satisfy the liability first on all non-defaulting banks in the proportion that each non-defaulting bank’s available collateral (collateral in excess of collateralized obligations) bears to the aggregate available collateral of all non-defaulting banks. If these calls do not satisfy the liability, then a further call would be made in proportion to each non-defaulting bank’s remaining assets. Upon making a call on non-defaulting banks with respect to a Systemwide Debt Security issued on behalf of a defaulting bank, the FCA is required to appoint FCSIC as the receiver for the defaulting bank. The receiver would be required to expeditiously liquidate assets of the bank.

AgFirst did not anticipate making any payments on behalf of its co-obligors under the Joint and Several Liability Allocation Agreement for any of the periods presented. The total amount outstanding and the carrying amount of the Bank’s liability under the agreement are as follows:

<i>(dollars in billions)</i>	6/30/16	12/31/15
Total System bonds and notes	\$ 254.634	\$ 243.335
AgFirst bonds and notes	\$ 29.068	\$ 27.973

From time to time, legal actions are pending against the District in which claims for money damages are asserted. On at least a quarterly basis, the District assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management and legal counsel are of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the District. Because it is not probable that the District will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

Note 9 — Additional Financial Information

Offsetting of Financial and Derivative Assets

June 30, 2016						
Gross Amounts Not Offset in the Balance Sheets						
(dollars in thousands)	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Balance Sheets	Net Amounts of Assets Presented in the Balance Sheets	Financial Instruments	Cash Collateral Received	Net Amount
Derivatives	\$ 1,929	\$ —	\$ 1,929	\$ —	\$ —	\$ 1,929
Reverse repurchase and similar arrangements	224,514	—	224,514	(224,514)	—	—
Total	\$ 226,443	\$ —	\$ 226,443	\$ (224,514)	\$ —	\$ 1,929

December 31, 2015						
Gross Amounts Not Offset in the Balance Sheets						
(dollars in thousands)	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Balance Sheets	Net Amounts of Assets Presented in the Balance Sheets	Financial Instruments	Cash Collateral Received	Net Amount
Derivatives	\$ 5,174	\$ —	\$ 5,174	\$ —	\$ —	\$ 5,174
Reverse repurchase and similar arrangements	211,554	—	211,554	(211,554)	—	—
Total	\$ 216,728	\$ —	\$ 216,728	\$ (211,554)	\$ —	\$ 5,174

There were no liabilities subject to master netting arrangements or similar agreements during the reporting periods.

A description of the rights of setoff associated with recognized derivative assets and liabilities subject to enforceable master netting arrangements is located in Note 10, *Derivative Financial Instruments and Hedging Activities*.

The reverse repurchase agreements are accounted for as collateralized lending.

Note 10 — Derivative Financial Instruments and Hedging Activities

One of the District’s goals is to minimize interest rate sensitivity by managing the repricing characteristics of assets and liabilities so that the net interest margin is not adversely affected by movements in interest rates. The District maintains an overall interest rate risk management strategy that may incorporate the use of derivative instruments to achieve that goal. Currently, the primary derivative type used by the District is interest rate swaps, which convert fixed interest rate debt to a lower floating interest rate than was achievable from issuing floating rate debt with identical repricing characteristics. They may allow the District to lower funding costs, diversify sources of funding, or alter interest rate exposures arising from mismatches between assets and liabilities. Under these arrangements, the District agrees with other parties to exchange, at specified intervals, payment streams calculated on a specified notional principal amount, with at least one stream based on a specified floating rate index.

The District may also purchase interest rate derivatives, such as caps, in order to reduce the impact of rising interest rates on its floating-rate debt, and floors, in order to reduce the impact of falling interest rates on its floating-rate assets. In addition, the District may also fix a price to be paid in the future which qualifies as a derivative forward contract.

As a result of interest rate fluctuations, interest income and interest expense related to hedged variable-rate assets and liabilities, respectively, will increase or decrease. Another result of interest rate fluctuations is that hedged fixed-rate assets and liabilities will appreciate or depreciate in market value. The effects of any earnings variability or unrealized changes in market value are expected to be substantially offset by the District’s gains or losses on the derivative instruments that are linked to these hedged assets and liabilities. The District considers its strategic use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

The primary types of derivative instruments used and the amount of activity for the periods presented is summarized in the following table:

Notional Amounts <i>(dollars in millions)</i>	For the Six Months Ended June 30,			
	2016		2015	
	Receive- Fixed Swaps	Forward Contracts	Receive- Fixed Swaps	Forward Contracts
Balance at beginning of period	\$ 150	\$ –	\$ 250	\$ 1
Additions	–	1	–	3
Maturities/amortization	–	–	–	(4)
Terminations	–	–	–	–
Balance at end of period	\$ 150	\$ 1	\$ 250	\$ –

By using derivative instruments, the District exposes itself to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract, the District’s credit risk will equal the fair value gain in the derivative. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes the District, thus creating a repayment risk for the District. When the fair value of the derivative contract is negative, the District owes the counterparty and, therefore, assumes no repayment risk.

To minimize the risk of credit losses, the District transacts with counterparties that have an investment grade credit rating from a major rating agency and also monitors the credit standing of, and levels of exposure to, individual counterparties. The District typically enters into master agreements that contain netting provisions. These provisions allow the District to require the net settlement of covered contracts with the same counterparty in the event of default by the counterparty on one or more contracts. A number of swaps are supported by collateral arrangements with counterparties.

Counterparty exposure related to derivatives at:

<i>(dollars in millions)</i>	June 30, 2016	December 31, 2015
Estimated Gross Credit Risk	\$1.9	\$5.2
Percent of Notional	1.29%	3.45%
Cash Collateral Held <i>(on balance sheet)</i>	\$–	\$–
Securities Collateral Held <i>(off balance sheet)</i>	\$–	\$–
Cash Collateral Posted <i>(off balance sheet)</i>	\$–	\$–
Securities Collateral Posted <i>(on balance sheet)</i>	\$–	\$–

The District's derivative activities, which are performed by the Bank, are monitored by the Asset-Liability Management Committee (ALCO) as part of its oversight of the District's asset/liability and treasury functions. The Bank's ALCO is responsible for approving hedging strategies that are developed within parameters established by the Bank's Board of Directors through the analysis of data derived from financial simulation models and other internal and industry sources. The resulting hedging strategies are then incorporated into the overall interest rate risk-management strategies.

Fair Value Hedges

For derivative instruments designated as fair value hedges, the gains or losses on the derivative, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in current earnings. The District includes the gain or loss on the hedged items in the same line item (interest expense) as the offsetting loss or gain on the related interest rate swaps. The amount of the loss on interest rate swaps recognized in interest expense for the three months ended June 30, 2016 was \$3.2 million, while the amount of the gain on the Systemwide Debt Securities was \$3.2 million. The amount of the loss on interest rate swaps recognized in interest expense for the six months ended June 30, 2015 was \$5.2 million, while the amount of the gain on the Systemwide Debt Securities was \$5.2 million. Gains and losses on each derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Cash Flow Hedges

From time to time, the District may acquire when-issued securities, generally government agency guaranteed bonds. The when-issued transactions are contracts to purchase securities that will not be delivered until 30 or more days in the future. These purchase commitments are considered derivatives (cash flow hedges) in the form of forward contracts. Any differences in market value of the contracted securities, between the purchase and reporting or settlement date, represent the value of the forward contracts. These amounts are included in Other Comprehensive Income (OCI), and Other Liabilities or Other Assets as appropriate, as firm commitments in the District's Balance Sheet for each period end. As of the periods presented, the District had not committed to purchase any when-issued bonds.

For derivative instruments that are designated and qualify as a cash flow hedge, such as the District's forward contracts, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

Fair Values of Derivative Instruments

The following tables represent the fair value of derivative instruments designated as hedging instruments for the periods presented:

<i>(dollars in thousands)</i>	Balance Sheet Classification – Assets	6/30/16 Fair Value	Balance Sheet Classification – Liabilities	6/30/16 Fair Value
Receive-fixed swaps	Other Assets	\$ 1,929	Other Liabilities	\$ –
Forward contracts	Other Assets	–	Other Liabilities	–
Total		\$ 1,929		\$ –

<i>(dollars in thousands)</i>	Balance Sheet Classification – Assets	12/31/15 Fair Value	Balance Sheet Classification – Liabilities	12/31/15 Fair Value
Receive-fixed swaps	Other Assets	\$ 5,174	Other Liabilities	\$ –
Forward contracts	Other Assets	–	Other Liabilities	–
Total		\$ 5,174		\$ –

The following table sets forth the amount of net gain (loss) on derivatives recognized in earnings and, for cash flow hedges, the amount of net gain (loss) recognized in AOCI for the periods presented. See Note 5, *Shareholders' Equity*.

<i>(dollars in thousands)</i>	Location of Gain or (Loss) Recognized in, or Reclassified from AOCI into, Income	Amount of Gain or (Loss) Recognized in, or Reclassified from AOCI into, Income *		Amount of Gain or (Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)		Amount of Gain or (Loss) Recognized in OCI on Derivative (Effective Portion)	
		2016	2015	2016	2015	2016	2015
Fair Value Hedges:							
Receive-fixed swaps	Noninterest income	\$ –	\$ –				
Cash Flow Hedges:							
Firm Commitments	Interest Income	\$ (63)	\$ 268	\$ –	\$ –	\$ –	\$ –
Forward Contracts	Gains (Losses) on Other Transactions	5	105	–	–	5	105

* Represents total gain or loss for fair value hedges and effective portion for cash flow hedges.

Note 11 — Regulatory Enforcement Matters

In February, 2016, the FCA terminated the written supervisory agreement with one District Association with total assets of approximately \$173.1 million as of June 30, 2016.

Note 12 — Subsequent Events

The District evaluated subsequent events and determined there were none requiring disclosure through August 8, 2016, which was the date the financial statements were issued.
